
Partner of Industry: 120 Years Müller Group

The Müller Group, headquartered in Münchenstein, Switzerland, very close to the Basel pharmaceutical and chemical industry, is celebrating this year its 120 years of existence. The tinsmith workshop founded in 1897 has become today a family-run, internationally operating industrial company employing over 440 people at four locations in Switzerland and Germany. A network of 54 agencies ensures worldwide presence. The Company develops, produces and sells industrial packaging and product handling systems and cleaning facilities for applications in the pharmaceutical, chemical, hygiene, cosmetics, flavours and fragrances, food, mineral oil, paints and lacquers, semiconductors, warehousing and distribution branches. The activities of the two divisions Industrial packaging and Handling & Processing are shared among five independent Companies grouped in the MVM Pack-Holding AG.

Industrial packaging division

Müller offers a wide range of optimal packaging solutions for main industrial sectors with high flexibility and constant quality. The product portfolio includes reliable steel barrel packaging, robust fibre packaging and high-quality plastic packaging.

All products are UN type-approved for the transport of hazardous goods.

Müller Packaging manufactures tight head and open head drums up to 230 L, cylindrical and conical drums, as well as a wide range of stainless steel and composite drums out of light gauge sheet metal. The Company also produces lidded kraft liner drums in various versions (coloured, laminated inside and/or outside, with rabbeted PE bag.)

Müller Plastics manufactures canisters and drums from 3 to 60 L, as well as individual technical moulded parts out of polyethylene. The Company specializes in coextruded conductive plastic containers with antistatic external coating. The portfolio is completed with a commercial range of lid and wide-neck drums, and large containers from 60 to 1.000 L.

Handling & Processing division

This section of the Müller Group is mainly aimed at the pharmaceutical industry. As a system provider, it offers global solutions with coordinated interfaces for the whole value chain in the pharmaceutical production, from the suitable container for transport and storage, through

filling, emptying, weighing, blending and containment, up to the automated cleaning of containers and production equipment, as well as automatic conveying, loading and pallet changing technology. Products and facilities are characterised by state-of-the-art hygiene design, highest product safety and reliability.

Müller Systems & Handling produces pharma-compliant lid and tight-head drums in 20 different sizes, as well as stainless steel containers (IBC) up to 2000 L. In addition, the Company designs and builds dust-free feeding systems, high-containment solutions, emptying systems for high-viscosity products, process vessels, mobile and stationary lifting columns and blenders for every container type.

Müller Cleaning is the specialist for automated, validated cleaning processes: Pharma-compliant washers of different sizes for drums, containers, vessels glassware, filling facility components and tablet presses.

Müller Intralogistics develops, manufactures and assembles complete system solutions. The Company offers container conveying facilities, load lift facilities, pallet transport and changing systems and robotized systems for automatic loading and unloading.

Müller: Industrial Packaging, Processing and Handlingsystems, Cleaning Solutions.
